### ABOUT ME

Hi,

I'm a Front-end web developer, excited to work in a collaborative environment to help you with your products and provide you quality solutions for the web using upto date methodologies.

I am really passionate about learning new technologies and experimenting, and enjoying working on real world high performance and asthetic projects

My Hobbies: Traveling, reading, youtube

I'm Excited And looking forward for this role.

### WORK EXPERIENCE

I have worked as a freelance front-end developer on upwork for about a year and helped lot of clients with beautiful and modern looking websites.

during those days I learned a lot of amazing skills like negotiating and understanding the needs of clients with having point to point effective communications.

### EDUCATION

- Matriculation in Science 2016-2018 (A+)
- FAC/A level in pre-engineering 2018-2020 (A)
- Bachlors in Computer Science 2020-2024 (3.7 CGPA)

### SKILLS

### PROJECTS

Following are few of my recent Projects.

- SC Apps:** This is the collection of two apps with glassy UI, one is weather app where I use weather API to pull data and the other is todo app.
- DipSip:** This is for a fictional coffe business with awsome UI and smooth GSAP Animations
- PWI Soupbox:** This was the project that I did for my client from [www.projectworldimpact.com](http://www.projectworldimpact.com), I had to get ready the front end for their backend developers to implement the back end logic, I was responsible for implementing the UI
